As I turn to the beat of the hard pounding feet swishing the loose dirt I remind myself that horse's hooves are actually their toe nails. As I stand on the stirrups and count 12 of the horse's steps, I take in the shining coat of Jasmen. Jasmen is the best horse in the world. I know her favorite food, ride, moves and many more. As I ride under the pink, orange and red sunset I did a slow crazy 8 (Jasmen's favorite). "Focus," I tell myself as I did a sloppy circle. "I don't want to run Jasmen into a rock or something." As I cleared my mind into pure nothing, I stood on the stirrups and waited 8 beats. Slowly me and Jasmen melted into one, our heart beats matching, our minds clear and focused. For the next 20 min. we did everything perfect. "Come Jasmen we're going on the trail." I said as I turned her out of the ring.

I know a lot about Mexico and the city of Oaxaca. One of the things I know a lot about is the food. There are tamales, enchiladas, champurado, (that's like chocolate) and lots more. Something that is also really important or famos Guelaguetsa. You may be wondering what that is, the Guelaguetsa is where all the distrects or what you will call it in spanish "pueblos" get together and dance the dances of their pueblos. I know all that stuff because my dad was born in a pueblo called Valde Flores and my ant is also from Oaxaca but from another district call Santana. Well I guess I should tell you more about something else. The other thing I know about Mexico it's Huatulco and pueblos around Huatulco. It's a district where their is a beutiful beaches. And a other really important district is Puerto Escondido. It's so important because of the waves in the beaches. The waves can get up to 20 feet tall.....Gladys
